PERSONAL STATEMENT

I am in my third year studying a Bachelor of Computer Science major, driven by a strong interest in coding and design. My goal is to combine the technical skills I have gained in this degree with creative thinking to build user-focused interfaces. Since high school, I have been interested in creating accessible interface and aim to pursue a career where I can use this passion alongside the skills to turn that dream into a reality through engineering. I believe that great software and accessible software go hand in hand, and I want to apply both my technical and design skills to build interfaces that bridge that gap. I see accessibility and usability as core components of writing good code, and that is the kind of engineer I aspire to be.

SKILLS

- **Languages:** HTML, CSS, JavaScript, PHP, Java, C#, XML
- **Libraries/Frameworks:** React, Next.js, Express (familiar with)
- **Tools:** Github, Figma, Android Studio, VS Code, Command Line, Node.js, Sanity CMS
- **Databases and APIs:** MySQL, REST APIs, Axios, Fetch, JSON
- **Testing Tools:** JUnit (unit testing), Postman (API testing), browser dev tools
- Microsoft Project (project management)
- Adaptability
- Critical thinking and decision making
- Teamwork
- Persistent mindset
- Detail-oriented
- Task delegation
- Experience in customer service

WORK EXPERIENCE

- The University of Waikato**

MAR 2026 - PRESENT

Sessional Assistant

Supported students across multiple programming papers by marking lab exercises and providing one-on-one guidance during lab sessions. Helped students debug code and understand core programming concepts, adapting explanations to different skill levels, and provided constructive feedback on lab submissions to reinforce learning outcomes.
- Filipino Students' Association of Waikato**

OCT 2025 - PRESENT

Marketing and Communications Assistant

Member of a student-run club at the University of Waikato for Filipino students where I work in a marketing team of two to create graphics (posters, videos) for events and update the social media pages when needed. We're the first point of contact for students who are interested in our club and our task is to ensure that they stay informed and that they receive accurate information.
- Nick's Kitchen**

JUL 2022 - DEC 2023

Cashier & Chef Assistant

Employed as a part-time worker at Nick's Kitchen as a cashier and chef assistant. Working in a team, my main responsibility was to take customer orders, address customer questions and concerns, and offer an extra hand during busy periods to fulfil orders promptly. My other tasks included preparing ingredients for certain meals, restocking ingredients, washing dishes, and sometimes cooking meals.

LANGUAGES

- English (Fluent)
- Tagalog (Native)
- Japanese (Basics)

RESPONSIBILITIES,
ACHIEVEMENTS AND
AWARDS

- 2022
- Board of Trustees Award
- 2021
- Proxime Accessit - Second highest academic in Year 13
 - Prefect for Fortitudo Tutor Group
- 2017 - 2021
- Member of the high school's badminton team. In my last year, I coached the team and won the MVP award.

REFEREES

Work
Nikolai Cruz
Owner/Director
Nick's Kitchen
Auckland, 1010
021 914 640
info@nickskitchen.co.nz

Elize Lotter
Owner
Tok Kai Cafe
022 685 3740

EDUCATION

TERTIARY EDUCATION
The University of Waikato

	Grade
2026 Papers	
Design and Analysis of Algorithms	A
Advanced Database Concepts	A+
Machine Learning	
Software Engineering Industry Project	
2025 Papers	
Data Structures and Algorithms	A
Programming for Creative Industries	A+
Systems and Networks	B+
Advanced Web Development	A+
Mobile Computing and Software Architecture	A+
User Experience Design	A
Logic and Computation	A+
Preparation for the Professional Workplace	A
Computer Science Work Placement	
2024 Papers	
Introduction to Statistical Methods	B+
Preparatory Mathematics	A+
Digital Business and Supply Chain Management	A+
Object-Oriented Programming	A
Web Development	A+
Cultural Perspectives for Computing and Mathematical Sciences	A+
Discrete Structures	A+

SCHOOL EDUCATION
Tokoroa High School

2017 - 2021
NCEA Level 3 with merit and university entrance
NCEA Level 2 with merit
NCEA Level 1 with merit

INTERESTS

I enjoy hands-on hobbies, particularly building Gunpla models and Lego sets, which requires patience, as I find it a lot of fun to take the time to make sure that everything is built perfectly, down to the last detail. During weekends, I enjoy playing multiplayer games with my siblings, like Overcooked and Stardew Valley. My current activities are things I can do on the go - knitting, nonograms, and designing projects on my laptop. My focus right now is creating a digitized yarn stash that will hopefully turn into a knitting projects tracker. I want to apply what I've learned to build something that actually benefits me, and this felt like the perfect place to start.

PROJECTS

Personal Portfolio | Next.js, React, CSS Modules, Resend, Figma, Ibis Paint X

Full-Stack Personal Portfolio Website

- Designed and built a personal portfolio with a folder filing cabinet aesthetic, featuring hand-drawn illustrations and an interactive bear mascot with cursor eye-tracking.
- Implemented a contact form with server-side input sanitization, max length validation, and rate limiting.
- Designed all visual assets including hand-drawn skill icons and sticker illustrations in Ibis Paint X.
- Implemented a responsive layout that adapts the folder aesthetic from landscape on desktop to portrait mode on mobile, with tabs repositioning to the side.

Vesperia Design Studios | Next.js, React, Sanity CMS, Resend, Framer Motion, CSS Modules, Figma

Interior Designer Portfolio Website

- Built a portfolio website for an interior design client using Next.js and Sanity CMS, allowing the client to manage and update content without touching code.
- Integrated Resend to enable a functional contact form for direct client-side inquiries.
- Designed the visual aesthetic inspired by Studio Olafur Eliasson, with animation patterns influenced by Design Well, for a distinctive and immersive user experience.

purrbit | HTML, CSS, JavaScript

Hackathon Submission

- Designed and built a tamagotchi-style Chrome extension where users care for an animated pixel art cat, for a 2-week hackathon.
- Implemented a dynamic mood system that reacts to player actions and decaying stats (hunger, happiness, energy, cleanliness), including sequenced sprite-based animations for state transitions.
- Built interactive mini-games (typing and math challenges) with randomised selection and timed scoring to reward player engagement.
- Used chrome.storage.local for persistent state management across the extension's popup and side panel modes.
- Developed hover-based petting interaction and inactivity detection to trigger context-sensitive cat behaviours.

Cell Simulation | Java, OOP

University Assignment

- Designed and implemented a simulation of an imaginative ecosystem with a simple predator-prey dynamic in Processing.
- Applied OOP principles (polymorphism and composition) to model unique cell behaviour and interaction.
- Added user-adjustable variables (temperature and reproduction rate) to allow users to influence the ecosystem.
- Implemented target-seeking and avoidance behaviour to simulate natural movement.
